

Benjamin Beres

Kirtland, Ohio 44094 • 440-214-2348 • bberes3@kent.edu • <https://benberes.netlify.app>

OBJECTIVE

Dean's List Computer Information Systems student seeking a full-time opportunity to apply strong programming, data analytics, and information systems expertise to drive data-informed decision-making and business performance.

EDUCATION

Bachelor of Business Administration

Kent State University

Major: Computer Information Systems

Minor: Finance

Expected Graduation: **May 2026**

Kent, Ohio

GPA: 3.6

TECHNICAL SKILLS

Languages

Data & Analytics Tools

Databases & Modeling

Systems & Technologies

Enterprise Systems

JavaScript, Python, HTML, CSS, SQL

Microsoft Excel, PowerBI, Power Automate

MySQL, Oracle, ER Diagrams, Astah (UML Modeling)

Git, Operating Systems, Network Fundamentals, System Architecture

Steel Viking Manufacturing System, Production Data Tracking

PROJECTS

Personal Portfolio Website, <https://benberes.netlify.app>

- Built multiple pages including home, about, projects, education, and contact sections using custom HTML and CSS layouts.
- Integrated project showcases linking to GitHub repositories and live applications.
- Structured the site for easy navigation and professional presentation of technical work.
- Implemented responsive design techniques to ensure the website functions seamlessly across desktops, tablets, and mobile devices.

NBA Player Analytics Dashboard, <https://nbaplayeranalytics.streamlit.app>

- Developed an interactive analytics dashboard to analyze NBA player performance using statistical metrics and visual exploration tools.
- Built multiple dashboard pages including player analysis, team summaries, statistical trends, and custom player rankings
- Implemented a ranking model allowing users to adjust weights for metrics such as scoring efficiency (TS%), scoring volume (PTS), and overall player impact.
- Applied clustering methods to group players into statistical archetypes such as playmakers, scorers, and defensive specialists
- Created data visualizations including correlation heatmaps, scatter plots, and PCA-based player similarity maps.

WORK EXPERIENCE

Dependable Stamping Co, Euclid, Ohio

Summer 2021 – Present

Data Analyst (Summer 2021 – Present)

- Created and maintained pricing models in Microsoft Excel to support accurate cost estimation and quoting
- Utilized the Steel Viking database to input, track, and analyze production and operations data, ensuring accuracy and accessibility for employees across departments
- Performed organization-wide hardware and software upgrades across company workstations, improving system performance, security compliance, and overall operational efficiency
- Maintained the project plans and schedules, ensuring that they would align with organizational goals and objectives.
- Built graphs and charts in Excel to visually present performance trends, financial data, and production metrics to supervisors and staff
- Used data manipulation to manage and update company inventory.

ACADEMIC ACHEIVEMENTS

Dean's List (6 Consecutive Semesters)

National Society of Leadership and Success (NSLS)

Information Systems Student Organization

Business Analytics Club

Fall 2023 – Spring 2025

Fall 2024 – Present

Fall 2024 – Present

Fall 2025 – Present
