

Benjamin Beres

Kirtland, Ohio 44094 • 440-214-2348 • benberes4@gmail.com • <https://benberes.netlify.app>

OBJECTIVE

Computer Information Systems graduate with hands-on experience supporting business applications, troubleshooting technical issues, and maintaining operational data systems in fast-paced production environments. Strong background in SQL, system support, data workflows, reporting, and application troubleshooting with experience collaborating across technical and business teams. Seeking an opportunity to contribute analytical, technical, and problem-solving skills.

EDUCATION

Bachelor of Business Administration
Kent State University
Major: Computer Information Systems
Minor: Finance

Graduated: **May 2026**
Kent, Ohio
GPA: 3.6

TECHNICAL SKILLS

Languages

Data & Analytics Tools

Databases & Integration

Systems & Technologies

Development Concepts

Enterprise Systems

JavaScript, Python, HTML, CSS, SQL

Microsoft Excel, PowerBI, Power Automate, Data Visualization

MySQL, Oracle, ER Diagrams, Astah (UML Modeling), APIs

Git, Operating Systems, Network Fundamentals, System Architecture

Object-Oriented Programming, Version Control, Testing & Debugging

Steel Viking Manufacturing System, Production Data Tracking

PROJECTS

Personal Portfolio Website, <https://benberes.netlify.app>

- Built and maintained a multi-page web application using HTML, CSS, and Git
- Structured application layout and navigation to ensure consistent user experience and maintainability
- Troubleshot application issues and optimized page structure, navigation, and responsiveness.
- Applied system design and testing principles to improve application stability and user experience.

NBA Player Analytics Dashboard, <https://nbaplayeranalytics.streamlit.app>

- Developed a multi-page analytics application using Python to process, analyze, and visualize structured datasets.
- Built data processing workflows to clean, transform, and organize data for analysis.
- Applied statistical models and clustering techniques to identify patterns and relationships in data.
- Created visualizations to validate data outputs and ensure accuracy of results.
- Performed data validation and testing to ensure accuracy, consistency, and reliability of analytical outputs across dashboards

WORK EXPERIENCE

Dependable Stamping Co, Euclid, Ohio

Summer 2021 – Present

Data Analyst/IT Support (Summer 2021 – Present)

- Built and maintained Excel dashboards using pivot tables, line charts, graphs, and data visualizations to track production metrics and operational performance.
- Analyzed operational and inventory data to identify trends, inconsistencies, and opportunities to improve reporting accuracy and business efficiency.
- Cleaned, validated, and maintained production data within the Steel Viking manufacturing system to ensure data integrity and consistency.
- Used Excel functions and analytical tools to summarize large datasets and present actionable insights to management and operational teams.
- Supported internal production and operational systems, ensuring reliable data flow across inventory, manufacturing, and reporting processes.
- Troubleshot hardware, software, and system issues by identifying root causes and restoring functionality across departments.
- Collaborated with cross-functional teams to support reporting enhancements, system updates, and operational improvement initiatives.

ACADEMIC ACHIEVEMENTS

Dean's List (6 Semesters)

National Society of Leadership and Success (NSLS)

Information Systems Student Organization

Business Analytics Club
